

TPA-03 THREE PHASE ADAPTER

TPA-03 three phase adapter allows users to make, TURA-01 Turns Ratio Meter and WinRes-20 Winding Resistance Meter applicable on three phase measurements.

Features

Only a single measurement cable is needed for the connection of both primary and secondary side with the TPA-03 three phase adapter.

TURA-01 can measure turns ratio of 3 phase power transformers easily and quickly with a single connection using TPA-03.

WinRes-20 can test winding resistance of primary and secondary winding of power transformers respectively or separately.

This option eliminates the connection complexity of the winding resistance gauges and can be done more quickly and easily.

Tap Changing Feature

TURA-01 and WinRes-20 would have additional features such as smart tap changing ability along with TPA-03.

Vector Group Detection

Transformers vector group can be determined automatically by using TPA -03 and TURA-01 together.

Cost Effectiveness

For those who are looking for low budget solution for measuring Turns Ratio and Winding Resistance on three phase test transformers, they can go on with TURA-01 and WinRes-20.

By using TPA-03 along with TURA-01, three phase measurements can be easily done.

Safety

TPA-03's ultra-safe connector type prevents possible contact to metallic parts of connectors by users.

• Distributor / Representative

HighTest Technology is a professional company based in UK which manufacturers high precise test equipment. We mainly focus on the development, manufacture and marketing of Transformer test systems. We have several years of experience in the field of developing and producing high end test equipment. Customer satisfaction is our prime motto. We supply our test equipment worldwide to Transformer manufacturers, Electrical utilities, general contractors and service companies. Our test equipment is designed and produced according to the most widely adopted international standards. As we value our customers the most, our well experienced team always provides an excellent after-sales support and technical assistance.
